SUMMARY

I am a web developer with over 4 years of experience in building various types of web-based applications using modern technologies and frameworks. Proficient in programming languages such as PHP and JavaScript, as well as frameworks like Laravel and Node.js.

My main focus is on code quality, system efficiency, and user experience. With a strong commitment to optimal software development, I always strive to deliver high-quality results that provide real value to both companies and end-users.

WORK EXPERIENCE

Back End Developer, PT Incore Systems Solution   **Sep 2022 - Apr 2025**

- Designed and developed APIs for SISMADU, a used cooking oil marketplace platform that facilitates transactions between users and system operators.
- Developed APIs for the SPHP BULOG rice distribution system, handling end-to-end processes from national distribution centers to local retailers with multi-level user integration.
- Designed and implemented APIs for the BisnisPro ERP system, supporting inventory management, sales operations, and corporate accounting needs.

Website Developer, PT Rewata Thera Indonesia   **Jul 2022 - Sep 2022**

- Developed a structured e-learning web application with features including interactive video lessons, student progress tracking, and automated certificate generation.

Website Developer, PT Mahakarya Inti Technology   **Jul 2021 - Jun 2022**

- Developed a Vendor Management System (Toko Gudang) application to support the procurement and sales of food supplies and office materials for Rumah Sakit Jantung Harapan Kita, ensuring efficient vendor coordination and inventory tracking.
